

Global success derived from experience...

Masteel UK Limited, founded in 2002 may be relatively young, but the combined years of steel market experience within the company ensures that they are fully aware of the challenging environment that customers face and their need for high quality products and services.

Centrally based in the West Midlands they are a stockholder, trader and processor of carbon steel, alloy and stainless steel products, selling into the steel industry both within the United Kingdom and to worldwide markets.

Diverse Stock

The diversity of the stock range has been carefully designed to cover an extensive range of specifications relating to industries such as offshore, oil, gas, petrochemical, nuclear, power generation, quarrying, mining and many more. The various products that Masteel supply to these industries include hot rolled plate, sheet, tubular, structural sections, and other associated products.

Extensive growth brought a change of location in 2006 when the company opened its 25,000 ft warehousing facility in which they hold several thousand tonnes of stock. January 2007 saw the opening of its Middle East regional office in Bahrain (now based in Sharjah, UAE) and in July the Asia/ Pacific regional office was opened in Singapore which has its own stockholding. Masteel has sustained continuous growth over the past 9 years and has recruited high calibre personnel from within the industry to support the company's success.

Having independent status and strong relationships with other stockholders and steel mills all around the world means they have access to a large array of steel stocks and allocations for mill rollings. Items outside of their current stock can normally be sourced immediately then dispatched or produced by a nominated mill. The "Fast Track" option offered allows for material to be produced to your contractual requirements in the minimum time possible. This option is very popular as it will keep your project on time and within budget.

Emphasis on Quality

Masteel's culture is based on a total commitment to quality. To demonstrate this commitment and also to encourage the consistent supply of materials and service to the highest possible standards, the quality management systems are certified by LRQA to International Standard ISO9001:2008 and audited against the requirements of that standard

Accordingly material is supplied fully certified with EN10204 3.1 or 3.2 certificates as required, with full traceability usually by hard stamping. Additional client or third party inspection is available at the request of the customer.

Where specific applications require materials with additional testing, Masteel can provide a complete testing service using independent NAMAS approved test houses. If testing requires EN10204 3.2 certification, tests would be witnessed by the customers nominated third party inspection agency.

Masteel today...

Masteel has seen continuous growth, particularly in export sales which now represents approximately 70% of the total turnover. As the business constantly evolves and identifies new products and markets, the company continues to operate strongly in the Middle East, Far East and South America with a solid and strong footing in the domestic UK market.

Looking to the future...

In such a fast paced marketplace, Masteel intend to consolidate their position as a major specialist steel stockholder with new steel products, continuous improvement in quality and back office systems together with dedicated investment in people which makes the company so successful and pleasurable to work for.
