## Serving the world's leading fabricators

Masteel specialise in the supply of high quality carbon steel plates to global industries such as petrochemical, oil & gas, offshore and chemical.

With a stockholding geared to service these industries and agreements with some of Western Europe's finest steel mills, we are well positioned to provide you with high quality carbon steel plates, regardless of your location.

## Masteel extends steel stockholding to the Far East

### Improved lead times for Asian & Pacific clients...

**As part of Masteel UK Limited's ongoing commitment to provide high quality steel to the global oil, gas and petrochemical industry, we are now stocking material in Singapore to better serve our Far Eastern client base.**

We recognise that the speed of delivery on certain contracts is essential which is why we are now holding a comprehensive range of high quality pressure vessel and boiler quality carbon steel plates for immediate supply.

**Patrick Lim**, General Manager of the Singapore Office states that "during my years of working with Masteel, it has become increasingly evident that we needed to further support our customers by providing a local stock source. Having the material readily to hand, will enable us to react instantly to our customer requirements, with additional UK based stock and dedicated quick mill rollings as part of our worldwide delivery program. This recent development further endorses Masteel's ongoing commitment to the provision of total steel solutions for our customers."
